ABOUT ME

I am software engineer with a strong foundation in JavaScript and REST API integration. I am passionate about business process automation and building efficient, scalable solutions using low-code tools and AI.

I am a proactive learner who can work independently or in a team to solve real-world business challenges. Ready for a full-time office-based role in Lviv.

SKILLS

- Automation & API:** REST API, Postman, Webhooks, JSON, Airtable (Basic), Make.com (Basic)
- Frontend & Logic:** JavaScript, TypeScript, HTML/CSS, React.
- Databases & Tools:** SQL (MS SQL), NoSQL (MongoDB, Firebase), Git, Jira
- Methodologies:** Business Process Automation, Object-Oriented Design, Analytical Thinking.

LANGUAGES

- English (B2 / Upper-Intermediate)
- Ukrainian (Native)

EDUCATION

2023 - 2027

LVIV POLYTECHNIC NATIONAL UNIVERSITY

- Bachelor of Software Engineering

WORK EXPERIENCE

CRM/ERP Platform for Dental Clinics

- A comprehensive web-based platform designed to digitize and automate complex business workflows for a network of clinics. Automated the full patient service lifecycle and material supply logistics. Designed custom data access and interaction logic tailored for multiple user roles.

Technologies: REST API, TypeScript, MS SQL Server, Firebase, React.

Duration: 6 months

OCT - MAR 2025-26

Cloud-Synchronized Wishlist Application

- A cross-platform application centered on secure data management and real-time cloud synchronization. Integrated secure user authentication protocols. Implemented continuous, real-time data synchronization between the application and cloud databases to ensure uninterrupted data flow

Technologies: REST API, TypeScript, MS SQL Server, Firebase, React.

Duration: 3 months

JUN - AUG 2025

Restaurant Order Management Solution

- A digital tracking system created to optimize daily order management and replace manual analog tracking. Developed a structured data flow for users to efficiently create, store, and manage orders. Built an interactive dashboard with statistical charts for data-driven insights and analytics

Technologies: Kotlin, Local Data Storage, Structured Data Design.

Duration: 2 months

APR- MAY 2025
